

Environmental sustainability, a healthy lifestyle, natural products at the center of our research & development activities, this is the strategy we are embracing to maintain our respect towards the future of our planet.

The evidence of our firm resolution is manifested by a strategic plan aiming to revolutionize the way we apply anti-adhesive coating.

THE NEW COURSE OF MONETA

FINEGRES: OUR NEW COURSE IN COATINGS

Our cookware is heading in a new direction in terms of anti-adhesive surfaces. Our **FINEGRES** coating is an exclusive, sol-gel application *sustainable as well as healthy since it is free from PTFE and PFAS*

FINEGRES consists of ***inorganic materials and natural ingredients*** such as water and alcohol and is applied through a patented process.

FINEGRES in virtue of its ***energy-efficient production cycle widely reduces the Co2*** emissions by curing at 230C° in comparison to the 450 C° required for the typical non-stick coating.

FINEGRES solidifies naturally on the aluminum substrate and forms ***a glass-like structure which is both scratch-resistant and*** homogeneously smooth at the same time, guaranteeing durability as well as an excellent release

**FINEGRES:
THE PRACTICAL
ADVANTAGES
IN THE KITCHEN**

DURABLE

FINEGRES is highly resistant to scratches and to the intensive stress while featuring long-lasting release properties.

NATURAL

FINEGRES does not contain **PFAS**, **PTFES**, **NICKEL**, **BPA** nor **PFOA**

SUSTANAIBLE

FINEGRES is highly energy efficient also in terms of a faster cooking time. It irradiates heat rapidly hence allowing the searing of food in a way that it retains all its nutritional properties.

FINEGRES

FINEGRES ITS NATURE PORTRAYED IN ITS COLOR

We have chosen to apply this coating with the most natural application process, free of any coloring elements. Hence it's neutral, light-grey tone, so close to the finest things and most soothing elements surrounding us. Yet from its reassuring, safe aspect it gains its elegance as well as its strength.

NOT ONLY FINGRES: MONETA'S GREEN IMPRINT

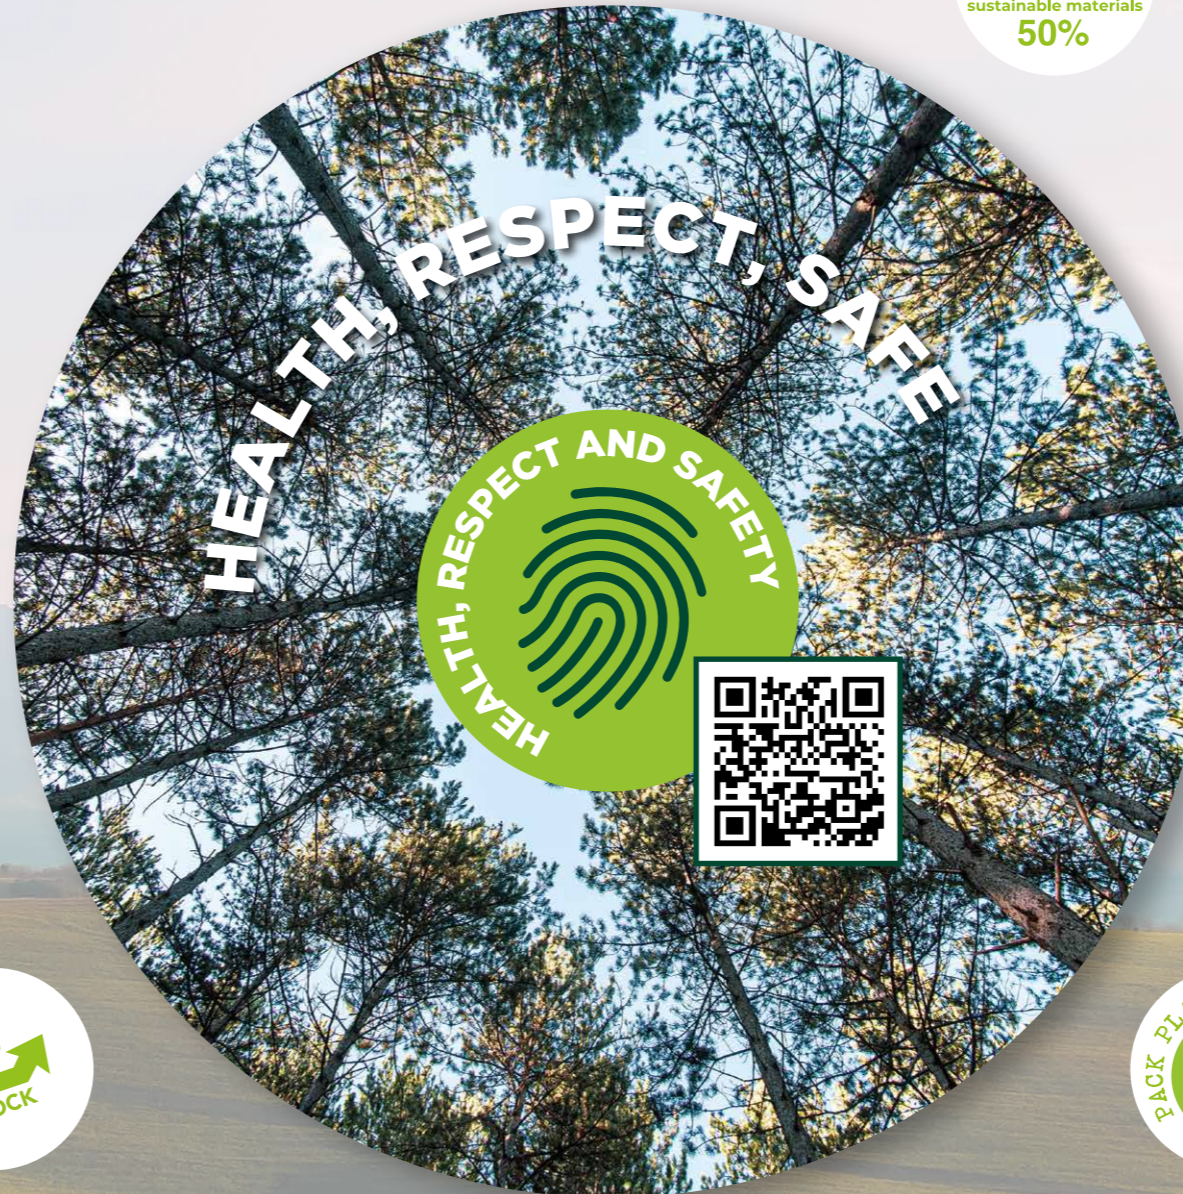

Our GREEN imprint is a project that encompasses all the activities we implemented in our new strategic course aimed at sustainability. Moving forward our production will not only an expression of quality excellence but also in the forefront of embracing environmental preservation.
